**TARIFF FORMAT**

- A. Page Numbering: Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 4 and 5 would be 4.1.
- B. Page Revision Numbers: Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file. For example, the 4th revised Page 4 cancels the 3rd revised Page 4.
- C. Paragraph Numbering Sequence: There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2  
2.1  
2.1.1  
2.1.1.A  
2.1.1.A.1  
2.1.1.A.1.(a)  
2.1.1.A.1.(a).I  
2.1.1.A.1.(a).I.(i)  
2.1.1.A.1.(a).I.(i).(1)

- D. When a tariff filing is made, an updated check sheet accompanies the tariff filing. The check sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision.

**SECTION 3 - DESCRIPTION OF SERVICE****3.1 General**

The Company offers direct dialed and automated operator assisted services to entities serving the transient public and to correctional facilities. Calls requiring live operator intervention, such as person-to-person, are routed to the underlying operator service provider selected by the host location and are not processed by the Company.

**3.2 Timing of Calls**

- 3.2.1** Billing for calls placed over the Company's network is based in part on the duration of the call. Timing of each call begins as specified below and ends when either the calling party or the called party hangs up. Calls are billed in full minute increments unless otherwise specified.

Auto-Collect Calls - Timing begins when the called party accepts responsibility for payment.

Auto-Person-to-Person - Timing begins when the calling party is connected to the designated called party or to an agreed alternate.

All Other Calls - Timing begins when the called station answers.

- 3.2.2** Unless otherwise specified in this tariff, the minimum call duration for billing purposes is one (1) minute.
- 3.2.3** No billing applies to incomplete or unanswered calls.
- 3.2.4** When a call begins in one rate period and ends in another rate period, the rate in effect at the calling station applies to the portion of the call occurring within that rate period. When a unit of time is split between two rate periods, the rate applicable to that unit of time is based on the rate period in which it began.

**SECTION 3 - DESCRIPTION OF SERVICE (Continued)****3.3 Calculation of Distance**

Usage charges for mileage-sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call.

The service wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the wire center of the customer and that of the destination point is calculated by using the industry standard vertical ("V") and horizontal coordinates ("H") coordinates.

Step 1: Obtain the V and H coordinates for the wire centers serving the customer and the destination point.

Step 2: Obtain the difference between the V coordinate of each wire center. Obtain the difference between the H coordinates.

Step 3: Square the differences obtained in Step 2.

Step 4: Add the squares of the V difference and the H difference obtained in Step 3.

Step 5: Divide the sum of the squares obtained in Step 4 by 10. Round to the next higher whole number if a fraction remains from the division.

Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if a fraction remains.

Formula:

$$\text{Mileage} = \sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

VACNET is a direct dialed service offered to customers for the transmission of voice or data communications.

**3.6.2 VAC Operator Service**

VAC Operator Service is offered to transient end users through host subscribers and to inmates at correctional facilities. Calls may be billed to telephone company-issued calling cards, collect to the called party, or to commercial credit cards.

**A. Classes of Calls**

Customer Dialed Automated Calling/Credit Card calls are placed by an end user who dials all of the digits required to route and bill the long distance call. Charges for each call are billed to either a valid telephone company issued calling card or to an authorized commercial credit card.

Auto-Collect calls are placed by an end user who dials all of the digits required to route the call and who follows the VAC system prompts, enabling the called party to accept the charges for the call.

Automated Person-to-Person calls are placed by an end user who dials all of the digits required to route the call and who follows the VAC system prompts, enabling the caller to designate an individual, department, or station with whom he/she wishes to speak.

**B. Automated Operator Service Charge**

Each class of call described above incurs a per-call automated operator service charge in addition to per-minute usage charges.

**SECTION 3 - DESCRIPTION OF SERVICE (Continued)****3.6 Service Offerings (Continued)****3.6.3 VAC Inmate Calling Service**

This specialized calling service is available when the correctional facility contracts for VAC Inmate Calling Service on behalf of the inmates. Special restrictions and limitations may apply to calls made by inmates, including restriction to collect-calls only. InterLATA, intraLATA and local calling are available, as specified by the correctional facility subscriber.

**3.6.3.A Collect Call Assurance Program**

The Company reserves the right to collect an advance payment equal to two (2) months of estimated collect calling service. If a calling history has not been established, the advance payment will be at least \$100.00, but will not exceed \$1,000.00. Payment must be made in U.S. dollars in the form of a cashier's check or money order.

The Company may limit charges to Customers who routinely accept collect calls from end users at correctional facilities at the advance payment level. During any billing cycle in which the customer is within 10% of the limit (the advance payment amount), the Company will offer the customer the choice of refusing service upon reaching the limit or increasing the advance payment. This allows the Company's collect customers to control the amount spent on collect calls from inmates while allowing the Company to offer service to customers whose credit worthiness would otherwise preclude continued service.

Where state law requires, the availability of a commissary account may be limited to collect call customers only.
